RIVERS COALITION RESOLUTION

Supporting House Bill 761 matched to Senate Bill 10

WHEREAS, the northern estuaries and Florida Bay are dying due to the destructive discharges from Lake Okeechobee; and

WHEREAS, House Speaker, Richard Corcoran is one of the authors of Blueprint Florida, a group whose goal is to leave a legacy; and

WHEREAS, the Florida Everglades and its associated estuaries are an internationally unique ecosystem, a national treasure and a significant economic driver for Florida's economy; and

WHEREAS, the citizens of Florida and Martin County, in overwhelming majority, voted to support the Florida Water and Land Conservation Initiative, Amendment 1; and

WHEREAS, additional land is needed to "flow" water during the dry/rainy season and eliminate harmful discharges from Lake Okeechobee to the Caloosahatchee and St. Lucie rivers and provide water supply for the natural system; and

WHEREAS, acquisition of key parcels completes the "River of Grass Flow"; reduces harmful freshwater discharges from Lake Okeechobee; improves the delivery of cleaner water to the Everglades; protects water supply interests; and supports a healthier ecological environment for Lake Okeechobee and the associated estuaries; and

WHEREAS, The mission of the Rivers Coalition is to fight for a safe, healthy and ecologically balanced St. Lucie River Estuary and Indian River Lagoon, natural resources that are vital to the economy and quality of life of Martin County and the Treasure Coast.

Therefore be it resolved:

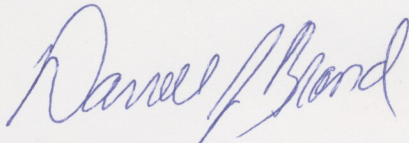

The Rivers Coalition represents 93 organizations with over 300,000 members that live along, work, or otherwise benefit from the St Lucie River and Estuary, and the Indian River Lagoon. For more than 90 years our region's economy has been sacrificed as the government-sponsored dumping grounds of polluted Lake Okeechobee water for the benefit of areas south of the lake.

We wholeheartedly support an amended House Bill 761, mirroring the latest version of Senate Bill 10, supporting a large dynamic reservoir that will be the centerpiece of activities to store, clean and convey Lake water south. These activities will help reduce the damaging discharges and restore the historic flow to the Everglades and Florida Bay as envisioned in CERP.

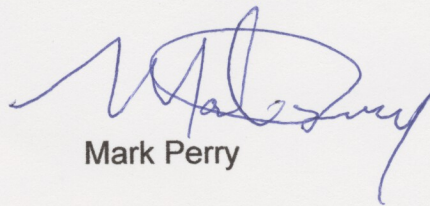

This plan is an historic milestone for Estuary and Everglades restoration and we urge all elected officials to support, fund and implement this plan. Let us leave a legacy!

DULY PASSED AND ADOPTED THIS 27TH DAY OF April, 2017

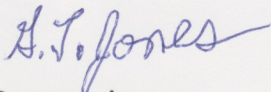

Rivers Coalition Leadership Team:

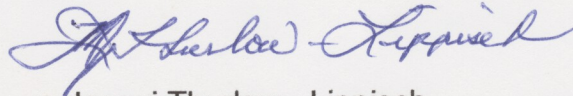

Darrell Brand

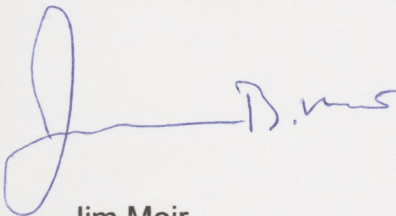

Mark Perry
